PROFESSIONAL PROFILE

Systems Engineering student (10th semester) and Developer Lead in my pre-professional internship at UNJFSC. I led a software development team of 12 to 15 people building custom e-commerce solutions and organizational management systems. Proficient in the Java / Spring Boot / Angular stack with PostgreSQL and in Laravel / React, with version control and automated cloud deployment. Seeking a Backend Software Developer position to contribute technical expertise and team leadership experience.

PROFESSIONAL EXPERIENCE

Universidad Nacional José Faustino Sánchez Carrión — Huacho, Peru *Aug. 2026 – Present*
Developer Lead (Pre-professional Internship) · Systems Engineering School – FIISI

- Lead the development team of the school's Pre-professional Internship Management System (practicaspre.kerpun.com): 13 modules and 5 user profiles (student, lead professor, supervising professor, company and administrator).
- Defined a domain-based modular architecture with Laravel 12, React 19, Inertia.js and MariaDB, and built the company validation flow by RUC with single-use token invitations.
- Run the workflow with Pull Requests and code review, backed by 120+ automated Pest tests, and automated deployment with GitHub Actions, Docker and Cloudflare.

Grupo Consigue Ventas Inversiones E.I.R.L. — Lima, Peru *Feb. 2025 – Jun. 2026*
Software Development Lead · Technology Department

- Led two teams (Backend and Frontend) of 12 to 15 developers, delivering 5 custom software projects end-to-end —e-commerce platforms and organizational management systems— with delivery times of 2 to 4 months depending on complexity.
- Designed microservices and hexagonal architectures with Java and Spring Boot; documented APIs with OpenAPI/Swagger, secured them with Spring Security (JWT/OAuth2), and used Apache Kafka for asynchronous communication between services, with Angular on the frontend and PostgreSQL as the database.
- Translated business requirements gathered by the analyst team into functional and non-functional requirements, and represented the development team in client meetings (via Google Meet) to validate adjustments.
- Prepared weekly progress reports for Management and established version control workflows with Git and GitHub, coordinating deployments on DigitalOcean with Docker.

FEATURED PROJECTS

AgroERP — Farm Management System (Fundo Castillo) fundocastillo.brunocastillo.dev *Own project · In production*

- ERP with 15 modules (field work, phytosanitary log, attendance, payroll, inventory, sales and per-plot profitability) built with Java 21, Spring Boot, Angular and PostgreSQL.
- Offline-first PWA for use in the field; deployed on a VPS with Docker and Caddy (HTTPS), daily backups to Cloudflare R2 and CI/CD with GitHub Actions.

GymManager — Gym Management System gym-management-sand.vercel.app *Personal Project*

- Web application for managing gym members, memberships and payments with React, TypeScript and Supabase, deployed on Vercel.

Personal E-commerce Project *Personal Project · In progress*

- E-commerce platform with Java and Spring Boot, applying the same architecture and security principles used in my professional experience.

EDUCATION

Universidad Nacional José Faustino Sánchez Carrión — Huacho, Peru
Bachelor's Degree in Systems Engineering — 10th semester (in progress)

CERTIFICATIONS

Microsoft SQL Server Specialization — Datux Perú S.A.C. *May – Jun. 2026*
Basic, Intermediate, and Advanced Levels · 68 hours · Grade: 19/20

TECHNICAL SKILLS

Languages & Frameworks: Java, Spring Boot, Spring Security, Laravel, PHP, Angular, React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
APIs, Security & Messaging: OpenAPI/Swagger, JWT/OAuth2, Apache Kafka
Databases: PostgreSQL, Microsoft SQL Server, MariaDB/MySQL
Integrations: Mercado Pago SDK, Driver API
Tools & Deployment: Git, GitHub, GitHub Actions, Docker, Caddy, Cloudflare, DigitalOcean

LANGUAGES

English: Intermediate Level — UNJFSC Language Institute (Basic: 2023–2024 · Intermediate: 2024–2025)
